| ABOUT US

A trusted technology solutions partner in Saudi Arabia

Smart Channels delivers integrated technology, communications, infrastructure and security solutions for businesses, institutions, facilities and events. Our capabilities span advisory and technical services, systems integration, managed services, project delivery and ongoing support — helping customers build reliable, secure and scalable environments.

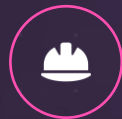

Thanks to our experience in project management and implementation, we make your project a safe, smart and advanced place.

Advisory & technical

Guiding clients to the technologies that serve their needs and drive tangible business growth.

Engineering team

Highly experienced engineers and technicians across design, implementation and maintenance.

Systems integration

Network, communications and security systems brought into one scalable architecture.

Managed services

Operation, monitoring and continuous support, with annual maintenance contracts.

| OUR MESSAGE & MISSION

**Providing end-to-end technology,
communications, infrastructure,
and security solutions**

- 01** Comprehensive and integrated solutions

- 02** Reliable solutions built to global standards

- 03** Quality, reliability and operational efficiency

| OUR MISSION

We are committed to carefully listening to our customers' distinct needs, fully understanding their requirements, and then guiding them to the best technologies that serve those needs and contribute to the tangible growth of their business.

We rely on the experience and professionalism of our employees and on close cooperation with our technology partners. Caring for our people is one of our most important investments: we develop initiative, cooperation and team spirit, and we are committed to excellence with transparency and responsibility.

| WHAT WE DO

From infrastructure to integrated solutions

We are a trusted partner for end-to-end technology services and solutions. Our capabilities cover the entire project lifecycle — from design and supply to installation, integration and maintenance.

STAY CONNECTED

Infrastructure & networks

Fiber and copper systems, cable management, racks, testing and certification. Data center cabling, cloud-managed switching and wireless access.

SMART SECURITY

Security & surveillance

Managed firewall, enterprise network security, cloud and endpoint protection. CCTV design, control rooms with AI analytics, access control and biometrics.

SEAMLESS COMMUNICATION

Unified communications

PBX and IP PBX from Cisco, Avaya, Panasonic, Alcatel and Grandstream. VoIP for enterprise and hospitality, plus video and voice conferencing.

SMARTER WORKSPACES

Smart buildings & workplace IT

The Sky-Walker building management platform, digital signage, CATV and IPTV, meeting room systems, workplace IT and maintenance contracts.

Connectivity & Internet

Cloud & Hosting

And
more

Our Solutions

A comprehensive portfolio of integrated technology solutions designed to connect, protect and empower modern businesses.

| INFRASTRUCTURE & DATA CENTRE

**Building the foundation for connected,
scalable and reliable technology**

We design and deliver robust infrastructure solutions for enterprises, multi-tenant buildings and data centers — from structured cabling and connectivity to racks, switching, fiber and complete infrastructure deployment.

| INFRASTRUCTURE & DATA CENTRE

Structured cabling & data center infrastructure

STRUCTURED CABLING

- Fiber optic cabling
- Copper cabling — Cat 6 / Cat 6A / Cat 7
- Cable management
- Racks and enclosures
- Testing, certification & documentation

DATA CENTRE

- Fiber connectivity & cable assemblies
- High-density fiber panels
- Pre-terminated MPO / MTP solutions
- Pre-terminated fiber trunks
- Rack & aisle containment

Infrastructure built for performance and growth

We design and deliver reliable infrastructure solutions that support today's technology while providing the scalability required for tomorrow. From structured cabling and fiber connectivity to data center infrastructure, every solution is designed around the customer's operational and business requirements.

| NETWORKING & CONNECTIVITY

Building reliable networks for connected businesses

We design, deploy and manage reliable network and connectivity solutions that keep businesses connected, secure and ready to scale. From enterprise networking and Wi-Fi to routing, switching, connectivity and network security, our solutions are built for performance, availability and long-term growth.

| NETWORKING & CONNECTIVITY

Active networking & IT support solutions

ACTIVE NETWORKING

- Enterprise & data center switching
- Cloud-managed networking
- Wireless & Wi-Fi solutions
- Next-generation firewalls & security
- Network routing & connectivity

NETWORK & IT SERVICES

- Network design & deployment
- Network monitoring & management
- Help desk & IT support
- Technology support services
- IT infrastructure support

AMC & managed support services

Proactive maintenance and ongoing technical support designed to keep your technology infrastructure reliable, secure and performing at its best. Our services include preventive maintenance, troubleshooting, software and security updates, system support, installation, commissioning and user assistance.

| SECURITY SOLUTIONS

**Protect what matters — from
people and property to networks
and data**

We deliver integrated security solutions that protect people, property, assets and digital environments. From CCTV and video analytics to access control, biometrics, firewalls and network security, our solutions provide reliable protection, visibility and control.

| SECURITY SOLUTIONS

Integrated security solutions for complete protection

PHYSICAL SECURITY

- CCTV & video surveillance
- Video analytics
- Access control
- Biometric systems
- Security monitoring
- Security system integration

CYBER & NETWORK SECURITY

- Next-generation firewalls
- Network security
- VPN & secure connectivity
- Endpoint protection
- Cloud security
- Security monitoring & management

Security that works around the clock

From physical security to network protection, we integrate the technologies that help keep your people, property, systems and data secure. Our solutions are designed for visibility, control, reliability and long-term protection.

| BIOMETRICS & ACCESS CONTROL

A matter of who, where and when

We design and implement access control and biometric solutions tailored to each organization's security requirements. From controlling who can enter, where they can go and when, to managing access across different areas and facilities, our solutions provide greater security, visibility and control.

| BIOMETRICS & ACCESS CONTROL

Access control for every level of security

From standalone access points to fully networked access control systems, we deliver scalable solutions tailored to the size, security and operational needs of each facility.

01

Card readers

Standalone and networked card readers for secure and convenient access across different facilities and environments.

02

Biometric readers

Fingerprint and biometric identification solutions integrated with access control systems for enhanced security and accountability.

03

Turnstiles & barriers

Turnstiles, vehicle barriers, road blockers and perimeter control solutions for secure entry and restricted areas.

04

Time & attendance

Integrated time and attendance solutions that help organizations manage employee working hours, attendance and access records.

| AUDIO & VISUAL SOLUTIONS

Immersive audio and visual solutions for every environment

We deliver integrated audio visual solutions for meeting rooms, classrooms, offices, retail spaces, events and large-scale environments. From displays and video walls to professional audio, digital signage and presentation systems, we design, supply, install and support solutions tailored to each space.

| AUDIO & VISUAL SOLUTIONS

Connecting people through audio and visual technology

From meeting rooms and classrooms to hospitality, retail and large-scale venues, we deliver integrated audio visual solutions designed around each environment and its unique requirements.

01

CATV & IPTV

Centralized CATV and IPTV solutions for hospitality, healthcare, residential and commercial environments, including distribution, management and display systems.

02

Video conferencing & collaboration

Professional video conferencing and collaboration solutions for meeting rooms, boardrooms, classrooms and distributed teams.

03

Digital signage & video walls

Digital signage, video walls, commercial displays and content solutions designed for communication, engagement and information delivery.

| UNIFIED COMMUNICATIONS & SMART BUILDINGS

Connected communications and smarter buildings

From enterprise IP telephony to intelligent building management, we integrate communication and facility technologies to create connected, efficient and easier-to-manage environments.

| UNIFIED COMMUNICATIONS & SMART BUILDINGS

Unified communications and intelligent building management

PBX systems & IP telephony

A private branch exchange concentrates central-office lines and provides intercommunication between a large number of stations. An IP PBX handles voice under Internet protocol, bringing the benefits of computer telephony integration (CTI) to enterprise and hospitality deployments.

CISCO

AVAYA

PANASONIC

ALCATEL

GRANDSTREAM

Others

Building management

A complete building management software solution able to monitor and control every building system — and more, including IT devices such as printers and network switches, inside the same software.

| VIDEO SURVEILLANCE & AI SOLUTIONS

Intelligent surveillance built for visibility, security and control

We design and deploy comprehensive video surveillance solutions tailored to the security and operational requirements of each environment. From IP CCTV and high-resolution cameras to AI-powered video analytics, thermal imaging, solar-powered surveillance and advanced multi-sensor systems, we deliver scalable solutions for permanent facilities, remote locations and temporary deployments.

More

| ADVANCED SURVEILLANCE TECHNOLOGIES

From intelligent cameras to AI-powered analytics

A look at the technologies we deploy at stadiums, holy sites, giga-projects and remote event locations.

01

Multi-sensor & panoramic cameras

Multi-sensor and panoramic camera solutions designed to provide wide-area coverage, high-resolution imaging and detailed visibility across large and complex environments.

02

Solar CCTV

Solar-powered surveillance solutions for remote and temporary locations, combining autonomous power, wireless connectivity and local or cloud-based recording.

03

AI-powered video analytics

AI-powered video analytics for people and vehicle detection, facial recognition, license plate recognition, object tracking, counting and other intelligent security applications.

04

IP, thermal & low-light CCTV

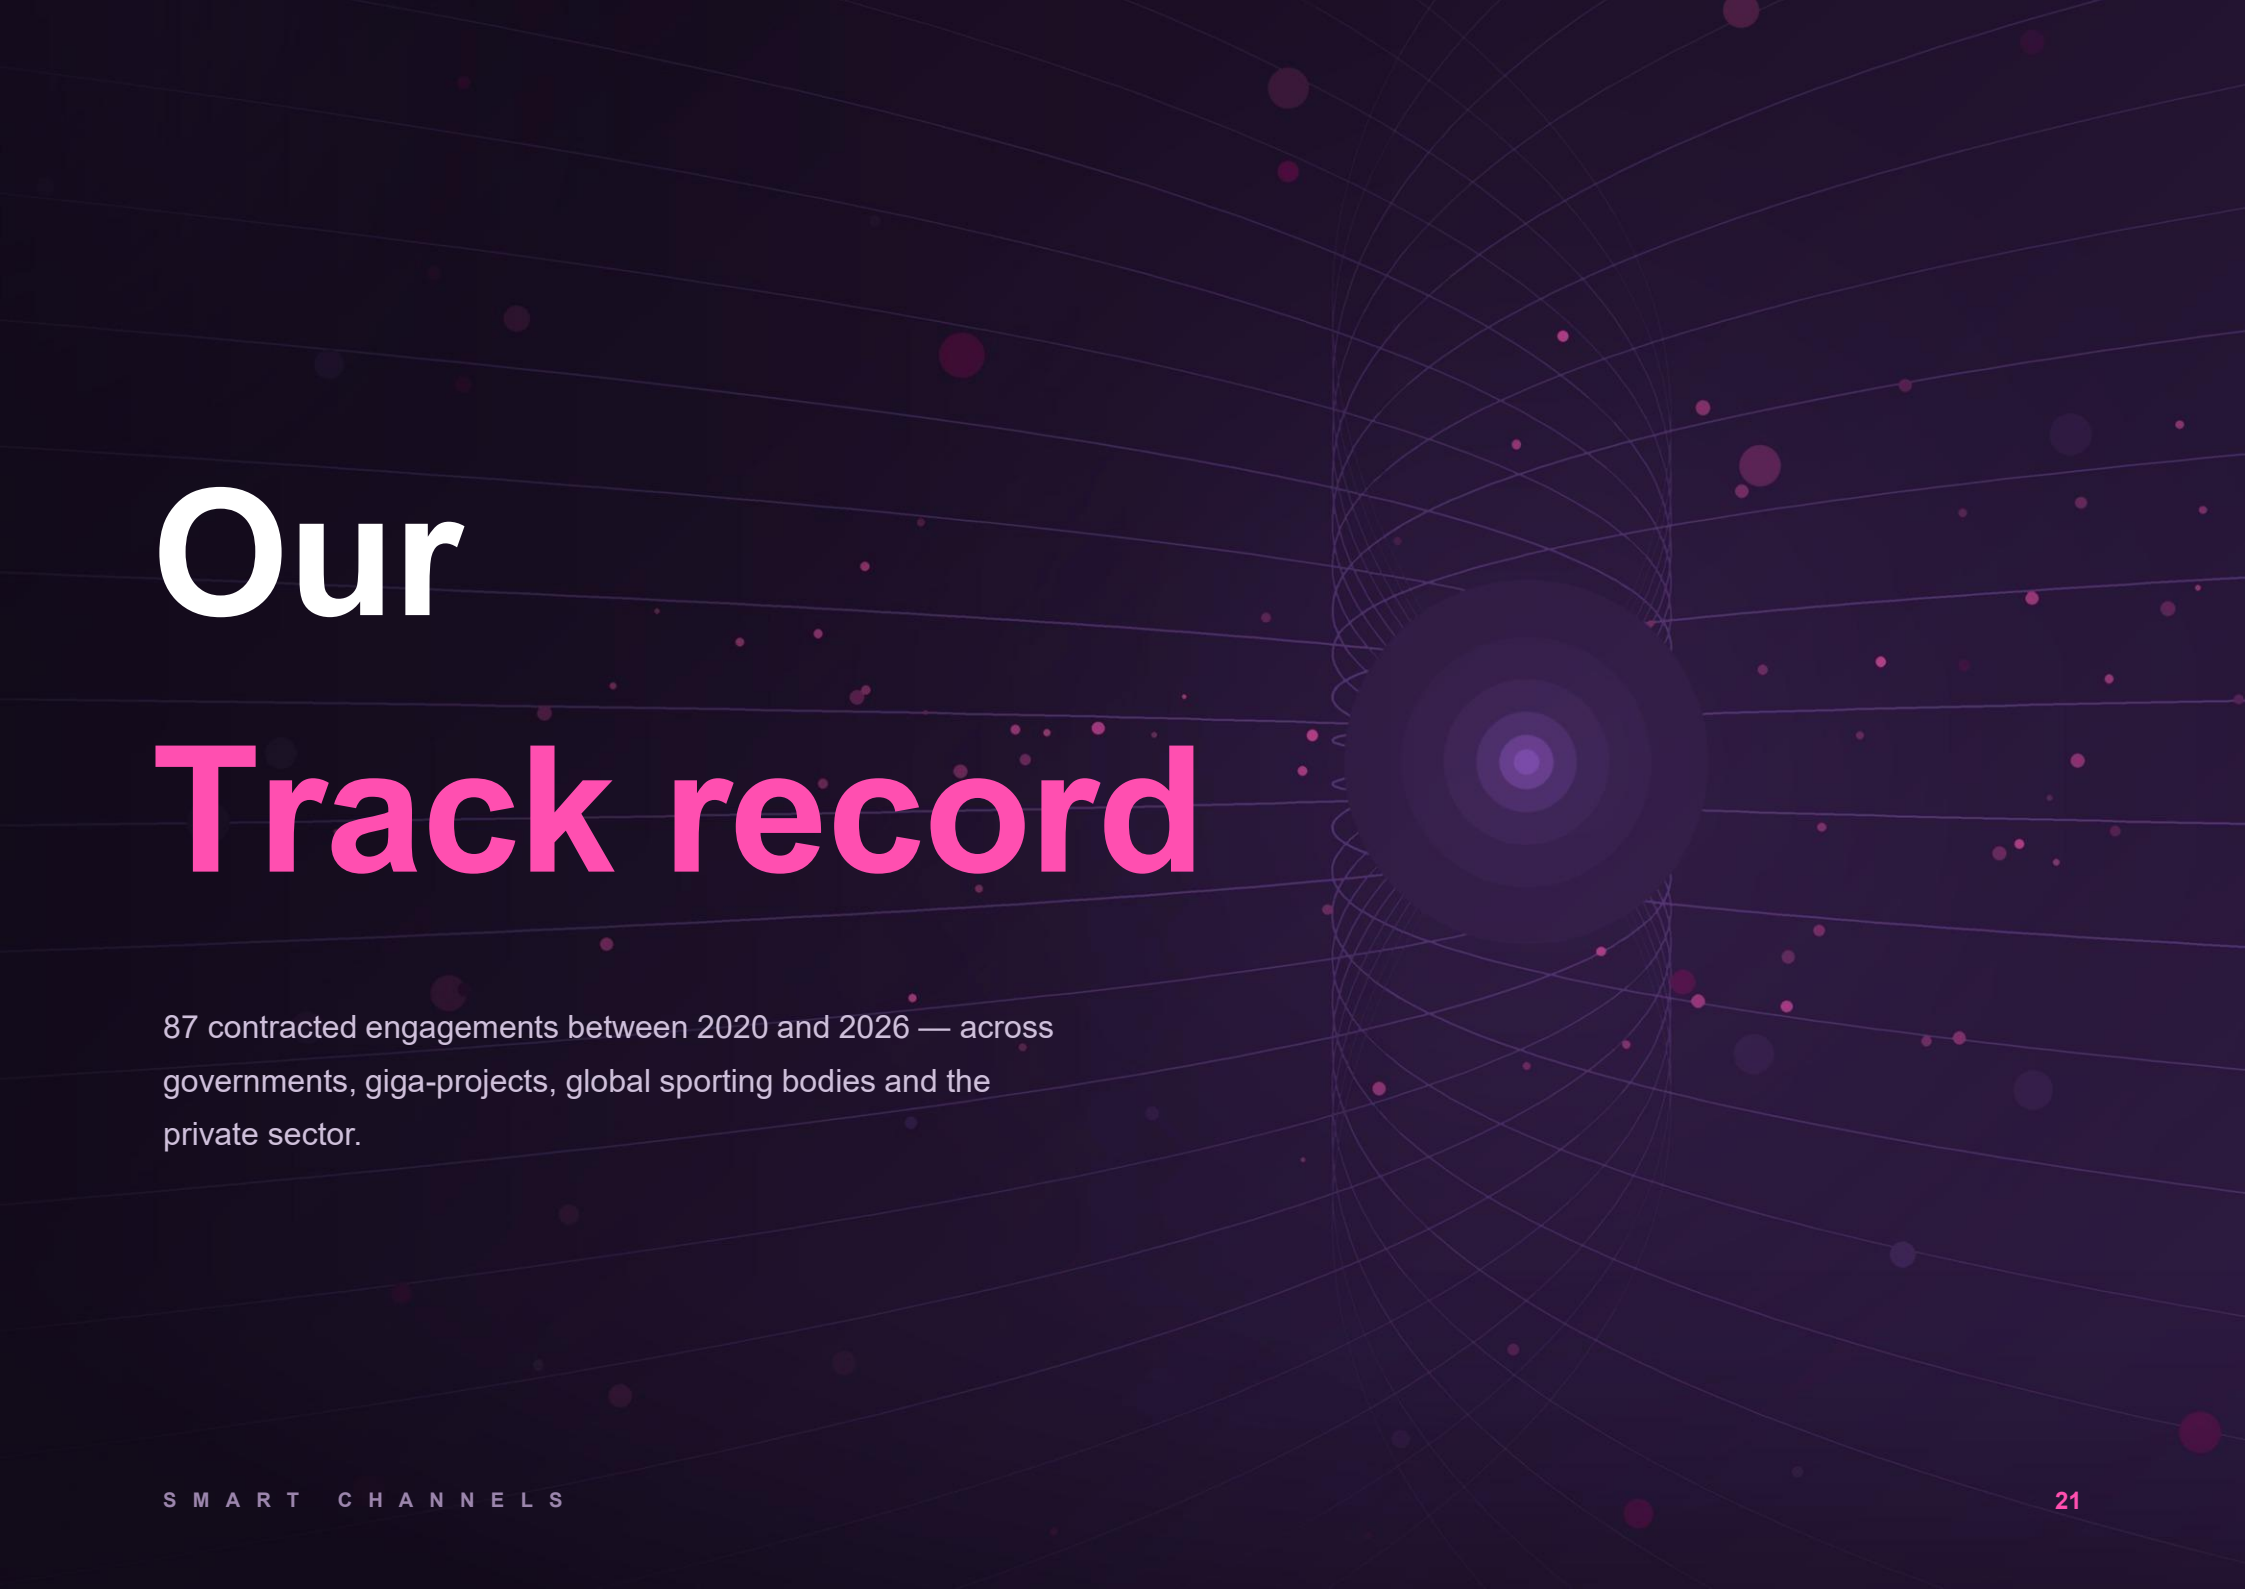

Advanced camera solutions for day and night surveillance, including high-resolution IP, thermal and low-light cameras for challenging environments and critical security applications.

05

ANPR / LPR solutions

Intelligent license plate recognition solutions for vehicle identification, access control, parking management and monitoring of vehicle movements across sites and facilities.

Our Track record

87 contracted engagements between 2020 and 2026 — across governments, giga-projects, global sporting bodies and the private sector.

| TRACK RECORD · 2019 — 2026
